Professional Summary

As a Web Developer, I'm an avid learner and highly attentive to details. I'm skilled in JavaScript/TypeScript/Go, React.js, Next.js, and Tailwind CSS, with a focus on building responsive, SEO-optimized web applications. Having worked with multiple startups in the past, I've gained significant experience in frontend development.

Experience

- **Hammer AI**   **California | US**
  Software Engineer   *Feb'24 – Present*
  Working as a remote contractor to introduce new features and fix existing bugs resulting in increasing site visits by 18%.

- **Flib**   **Gurgaon | Haryana**
  Frontend Engineer   *Oct'24 – Feb'25*
  Implementing new features and redesigning key components. Refactoring existing codebases to improve SEO and search engine rankings, contributing to increased web traffic and customer engagement.

- **Novita Automation**   **Pune | Maharashtra**
  Frontend Developer   *Sept'24*
  Collaborated with cross-functional teams to design and develop a user-friendly interface for an internal asset management system.

- **Google Developers Student Club – IKGPTU**   **Jalandhar | Punjab**
  Core Team Member   *August'23 – August'24*
  During my time in the GDSC, I had a chance to collaborate on front-end projects with my team mates alongside helping in organizing and participating in workshops and events.

Projects

- **Stripe Payment with Golang**   **GitHub**
  Stripe payment gateway implementation utilizes Stripe Go library to handle payment intents. Project includes a demo frontend to initiate payments.

- **Scientific Illustrator Portfolio**   **Live** | **GitHub**
  A personal portfolio for scientific illustrators with modern animations and aesthetics. Made with modern technologies like Next.js with its frontend capabilities.

- **Gemini Go**   **GitHub**
  Gemini Go is an AI-based response generator written in Go. The project uses Google's Generative AI to generate meme captions based on user-provided prompts.

Education
